

TEMARED Transporter 2515/2 flatbed trailer gvw 750kg

Product price:

1,275.68 €

Product short description:

Internal dimension (cm): **254 x 153 x 30**

Product description:

TRANSPORTER 2515/2 transport trailer designed for transporting materials. It has two axles. Extremely comfortable thanks to the possibility of opening or removing all sides, which enables loading irrespective of the side on which it is positioned. The support wheel facilitates manoeuvring when the trailer is standing up.

The transport surface of the trailer is 2545x1534x300 mm. Made of 9 mm thick waterproof plywood, it provides long-term resistance to even very intensive use. A solid underframe made of high-strength steel ensures that the trailer retains all its properties for many years. The sides can be opened from either side for convenient loading regardless of the position of the trailer.

The support wheel makes it easy to move the trailer when it is not attached to the vehicle. The 8 lashing points for securing the load and the adapted height of the sides guarantee the safety of the objects and materials on the trailer during transport.

Standard features

2 non-braked axles 750 kg

Independent suspension, sprung from torsion beam

Drawbar type V, hot dip galvanized

Wheels 155R13

Wheels under floorboard

Support wheel
