

Neptun GN192 N7-263 rtr single-axle light trailer on spring GVW 750 kg

Product price:

866.13 €

Product short description:

Internal size: **236 x 129 x 40**

Capacity: **550kg**

GVW Max: **750kg**

Product description:

The **RUSTIK** line of trailers is characterised by its high structural strength, which is ensured by the fully welded frame and drawbar, the cold-formed U-section frame stringers and its transverse beams.

An unquestionable advantage of this series are the profiled sides, 400 mm high, made of high-quality galvanised sheet metal. Specially profiled to achieve high

rigidity and impact resistance. The front and rear boards are openable, which is particularly useful for transporting long loads. All sides (front, rear and sides) are fully removable.

Trailers in the RUSTIK series have a tilting load bed, which makes it much easier to unload the goods.

Lightweight trailer, without inspections, for category B

AVAILABLE AT OUR BRANCHES IN MODRZYCA AND DOLNA GRUPA.

Standard features

Usable space: 236 x 129 x 40
