## **Product description:**

NEPTUN trailer from the RUSTIK line is characterized by high structural strength, which is ensured by a fully welded frame and drawbar, cold-formed U-section frame stringers and its transverse beams.

An unquestionable advantage of this series are the profiled sides, 400 mm high,

made of high-quality galvanized sheet metal. Profiled specifically to achieve high rigidity and impact resistance. The front and rear sides are openable - it is useful for transporting long loads. All sides (front, rear and sides) are fully removable, so you can get a flat platform for carrying larger loads.

RUSTIK series trailers have a tilting cargo box, which makes it much easier to unpack the cargo.

Lightweight trailer, without inspections, for category B.
